RSA enVision Certified Systems(R) Engineer 4.0

<http://killexams.com/pass4sure/exam-detail/050-v40-ENVCSE02>

- C. Internet Protocol Database (IPDB)
- D. enVision Proprietary Data Management (EPDM)

Answer: C

QUESTION: 64

When initially setting up a multiple appliance site, only the D-SRV unit is connected to a LAN ?all of the other units in the site then connect directly to the D-SRV.

- A. True
- B. False

Answer: B

QUESTION: 65

Which statement best describes enVision's Event Explorer?

- A. It contains all of the collected and parsed log messages from the IPDB .
- B. It can operate on any client operating system and filters event data to collect only high-risk events.
- C. It is the only tool that can be used to examine log data collected by enVision and stored in the IPDB .
- D. It is a client-server application and advanced analysis tool for examining real-time and historical data.

Answer: D

QUESTION: 66

When installing the Event Explorer client application it is important to use which of the following?

- A. A different computer than is used to access the enVision administrative GUI.
- B. A subnet mask that will allow direct connections to Remote Collector (RC) systems.
- C. A Windows account that has sufficient permissions to perform a software installation.
- D. A computer that has at least two network interface cards (NICs) to provide read/write access...

Answer: C

QUESTION: 67

What happens if an event source device type is not immediately recognized by RSA enVision?

- A. Data from that device will be discarded until the device type can be defined.
- B. An alert is generated by default to call an administrator's attention to the device.
- C. It will be defined as "unknown" and for a limited time enVision will collect event data it generates.
- D. The UDS Service will create a parsing XML file for the device and place data in the Parse Cache.

Answer: C

QUESTION: 68

In the enVision data flow, which of the following sequences represents the correct series of events?

- A. Data collection, data reporting, nugget creation, IPDB storage, data packaging
- B. Data collection, IPDB storage, nugget creation, data packaging, data reporting
- C. Data collection, nugget creation, data packaging, IPDB storage, event reporting
- D. Data collection, data packaging, IPDB storage, nugget creation, event reporting

Answer: C

QUESTION: 69

How many Remote Collectors (RC) can each Database Server (D-SRV) support?

- A. Eight (8)
- B. Ten (10)
- C. Sixteen (16)
- D. Thirty two (32)

Answer: C

QUESTION: 70

What functions are performed by an RSA enVision Remote Collector device? (Choose two)

- A. Allows real time alerts and correlated alert functions.
- B. Creates log data and forwarding to a Local Collector.
- C. Produces compliance data reports in remote locations.
- D. Allows administrator access through a remote GUI console.
- E. Provides data storage and forwarding to a Database Server.

Answer: A, E
