Answer: A, B

QUESTION: 70
A third-party Service equipment is used for various purposes in a manufacturing facility and needs to be overhauled once a year. This equipment is charged based on its consumption without a project dependency. At this point, it should be transferred out to the vendor's warehouse for maintenance and then returned back in the future depending upon the requirement. The material stock transfer should happen with an offline approval and with an account alias as a logical reference. What is the ideal way to handle this process?

A. Subinventory Transfer
B. Transfer Order
C. Move Request
D. Miscellaneous Transaction
E. Requisitions

Answer: A

QUESTION: 71
You have an organization that runs both its domestic and international business from the same offices. However, the organization does not want the domestic side of the business to be able to transact on the International side, even though they are selling the same

material. How do you configure your enterprise to meet this requirement?

A. Use data access security to separate what each customer can control.
B. Set up the domestic and International businesses as separate projects.
C. Set up the domestic and International businesses as separate cost centers.
D. Set up the domestic and International businesses as separate operating units.
E. Set up the domestic and International businesses as separate business units.6

Answer: A

QUESTION: 72
During Cloud Inventory implementation your customer requires you to enable the
Oracle Transactional Business Intelligence (OTBI) KPI to review the list of standard
reports which is useful for their Current business scenario. When navigating to reports
and analytics, the warehouse dashboard doesn't show any KPI watchlist.
