**Question: 88**

Which of the following statement about IVS1800 is wrong ?

- A . The local airport is suitable for a single IVS1800 scene
- B . For local man-machine scenarios, a PC needs to be prepared for business configuration
- C . The iClient client scenario is applicable to multiple IVS1800 scenarios
- D . iClient field is, need to prepare – a PC is used to configure the business

**Answer: B**

**Question: 89**

For the two-way single-lane scene where vehicles pass, which of the following camera selection methods is most suitable for?

- A . 4-cylinder machine 2 ball machine
- B . 4-cylinder machine
- C . 2-cylinder machine 1 ball machine
- D . 3-cylinder machine 2 ball machine

**Answer: C**

**Question: 90**

The video big data system can aggregate and store all kinds of video data (vehicles, faces, portraits, etc.) and perform standardized processing.

- A . True
- B . False

**Answer: A**

**Question: 91**

Which of the following is suitable for the conditions that meet the requirements for the connection between the upper and lower domains of the intelligent vision platform?

- A . The platforms are respectively IVS3S00 and IVS1800, and the docking protocol is ONVIF protocol
- B . The platforms are IVS3800 and IVS3800 respectively: the docking protocol is ONVIF protocol
- C . The platforms are IVS3300 and Mi 1estone respectively, and the docking agreement is NSS agreement
- D . platform were IVS3800 and IVS3800 docking protocols for the NSS agreement

**Answer: D**

### Question: 92

A park intends to add a dome camera to the existing integrated video site, which uses PoE to supply power. Which interface of PowerCube 500 should be accessed?

- A . DC48V
- B . PoE++ interface
- C . DC12V
- D . AC24V

**Answer: B**

### Question: 93

When checking the license operating status of the intelligent vision platform, what needs to be focused on is whether the license status is activated and the license utilization rate.

- A . True
- B . False

**Answer: A**

### Question: 94

The () function of the ball camera can ensure that the camera automatically returns to the preset position after manual operation.

- A . Caretaker
- B . Electronic map
- C . Preset position
- D . Cruise

**Answer: A**

### Question: 95

Which of the following descriptions about the H.265 encoding protocol is wrong?

- B . 265 uses a new MV (motion vector) prediction method
- D . 265 proposes multiple more flexible adaptive deblocking filters
- F . 265 transform block to expand 16X16, 32X32, 64X64 tree coding block
- H . 265 uses a simpler intra-frame prediction method

**Answer: A**

### Question: 96

Which of the following applications does not belong to the scope of target recognition?

- A . Objective 1: N search
- B . Hair color comparison

- C . Target 1:1 comparison
- D . Age recognition

**Answer: B**

**Question: 97**

- When multiple lens devices are installed in a certain area (exceeding the maximum number of windows supported by the client), and these video sites need to view the live video, which of the following functions can be used to achieve?
- A . Multiple layouts
  - B . On the wall
  - C . Cruise
  - D . Polling

**Answer: D**

**Question: 98**

- Which of the following are smart vision platform devices? (Multiple Choice)
- A . Light edge
  - B . Precision air conditioning
  - C . UPS
  - D . Micro-edge

**Answer: AD**

**Question: 99**

- If you need to uniformly manage the access platform and analysis platform on the HoLoSens iClient client, you need to configure the access platform correlation analysis platform in the CSPOM portal where the access platform is located.
- A . True
  - B . False

**Answer: A**

**Question: 100**

- Which of the following types of data cannot be used when the intelligent vision drier performs the intelligent analysis task of face detection?
- A . Video files uploaded directly to the platform
  - B . Video recorded by the camera in the SD card
  - C . Live camera
  - D . Historical videos stored on the platform

**Answer: B**
